

Seed Processing Plants

1. Seed Cleaning Machine
 - Effectively separates foreign particles and dust from seeds.
 - Works with all varieties of grains and seeds (sesame, mustard, aniseeds, bishop's weed, green gram, black gram, rice, cumin, etc.)
2. Vibro Seed Cleaning Machine
 - High competency aspiration system. Hopper aspiration for pre-screening and outlet aspiration for post-screening.
 - Product is air washed to rid it of dust, husk and fibres.
 - The top vibrating screen removes large impurities (sticks and leaves), while the bottom vibrating screen removes small impurities (fine dust and sand).
3. Seed Dehulling Machine
4. Seed Roasting Machine
